Club run day	“	“	27 th March
General meeting			9 th April
Club run day	Sunday		25 th April

Postal address: - P.O. box 681 Balcatta

Monthly general club meetings held in the Museum building in Laurie Strutt Park, Elvira st. Waterman at 7:45pm.

At the last committee meeting it was decided that the Club run days would be held on the Saturday afternoon at 3:00pm owing to the warmer temperatures during the next 3 months. Hope to see you there !

As it will be seen, the make up of the committee has not changed much, the only office to change was that of treasurer, ably filled by John Martin.

There is still a position of committee member that we would like to see filled. You may nominate yourself, we would be grateful.

We have been asked to dispose of a model engineers workshop. Details of equipment offered will be at the next general meeting.

A start has been made on our new clubhouse, our tireless crew has spent considerable time installing the power cable from the switchboard to a temporary distribution board near the building spot. Unfortunately there is not much to see as all of the work was buried as soon as it was completed. Never the less it is an essential part of the job. Also a duct was installed at the same time to carry signalling, compressed air and communications for the railway.

The rotunda (gazebo) has been at a standstill due to the installation work on the power, however we will continue soon. Why not be a part of it?

There is not much on the horizon in the way of commercial runs so our coffers will suffer. The birthday party functions offered to the public will be restructured where they fall on a run day, these may become more profitable.

As there has been several months of model engineering with out a meeting, you should have plenty of bits to show. Please don't rely on someone else to bring their offerings.

Ernie Redford is a keen gardener, and is refurbishing some of the gardens, and are looking great. There is a bit of general house keeping that needs to be maintained on an ongoing basis, trees drop leaves and weeds still grow etc. A bit of help here would be appreciated.
